## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Suzuki et al (JP 2001144019).**

Suzuki et al disclose a thermal processing unit comprising a holder for plurality of substrates (Fig 1-23), reaction container (2), process gas supplying mechanism (41,42,43,44,45 and 46), heating mechanism (31-36) and a controller which controls each gas circuit and each heating mechanism independently from each other according to a recipe which controls gas flows and heating power. Suzuki further teaches that a recipe for a certain process rate is modified depending upon the number of substrates in the batch so that dummy wafers may not be needed to fill empty slots.

### *Response to Arguments*

Applicant's arguments filed 10/12/2007 have been fully considered but they are not persuasive.

Applicant argues that Suzuki et al do not teach anything relative to the speed of the film forming process and is concerned with film thickness rather than film quality.

In fact nothing could be further from truth since Suzuki et al disclose that their invention (*recipe modification of flow rate depending upon number of substrates in a batch*) cures the

Art Unit: 1792

problem in the prior art related to processing speed, uniformity of processing on a wafer, uniformity across several wafers and process repeatability (Para 06 machine translation).

*Conclusion*

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
